Glad to hear you're on top of it! Thanks all for being so responsive. FYI – I already sent an email to someone in our 404 program to inquire with the Corps about permitting. I'll send you their response if/when something comes through.

Mr. Ireland,

We have sent our inspector, Bob Tatum, to do a site investigation.

Thanks,
Stacey

EPA does not issue stop work orders; not sure about EPD, but that's of course a "tool" often used by MS4s. More – importantly though, I'm not so sure it's necessary as long as the permittee also addresses BMP failures and SWPPP updates within the timeframes required by the permit. I do have to wonder about 404/wetland issues, whether the "excavation" would be in an unpermitted area. I'll send this concern to the Army Corps to search for permitting and for them to determine if a site visit is warranted.
